

Tuition Calculation

Path: Main Menu, Campus Solutions, Student Financials, Tuition and Fees, Tuition Calculation

1. **Service Indicators** can be a hold that prevents an individual or organization from receiving certain services or positive indicators that designate special services to be provided. Examples of negative service indicators include enrollment verification or transcript holds, and denied registration for classes.

⊘ negative service indicator ✳ positive service indicator

2. **Override Billing Units** – check this box to calculate tuition based on anticipated units. If you set the billing units as a part of tuition calculation, the system displays the number of the student's **Projected Billing Units**. You can edit this field

3. **Override Init Enrl Fee** – select this if you want to override an initial enrollment fee
Override Init Add Fee – select to override and initial add fee. **Our policy is not to override at this time**

4. **Tuition Residency** – this field displays the tuition residency that is calculated for the student. You can override the value and calculate it again to post the change amount

5. **Override Tuition Group** – Enter a tuition group other than the one to which the student is already assigned. When you calculate the student's tuition using this page, the system uses the tuition group that you enter in this field instead of the previously assigned group

6. **Tuition Group**- Until tuition and fees have been calculated at least once, this field is blank. After the calculation, the field displays the tuition group into which the student was placed upon calculation

7. **Tuition Calc Required**- The system selects this check when changes have been made to the student's enrollment or other attributes (such as placement in a student group) that require an initial or new calculation of tuition and fees

8. **Tuition Cal Date Time** – the system displays the date and time the tuition was last calculated

9. **Calculate Tuition and Fees** button to calculate tuition and fees. This time the **Tuition Group** and **Tuition Calc Date Time** fields are populated.
